For more detailed information & specifications on Entry Mats & Frames see Latham Flooring Systems Manual 5

Latham Dirt Control Entry Mats and Mat Frames

Recess Mounted and Surface Mounted Roll-Up Mats for commercial and industrial applications

The system consists of an extruded aluminium tread rail which carries factory installed inserts of either abrasive for slip resistance, carpet for dirt control or vinyl for limited slip resistance and dirt control. The system is continuously hinged with a neoprene joint which reduces traffic noise and rattle.

The easy to install, versatile roll up mat, either recessed or surface mounted, has many commercial applications. In entry-ways or in service areas of apartments, offices, hotels, motels, retail shops, malls, restaurants, bars and grills, schools, churches, factories etc.

The mats unique neoprene hinge design allows easy roll up and eliminates metal-to-metal contact and corrosion lock up. Mats can be vacuumed over or easily rolled back to remove collected soil and moisture from beneath.

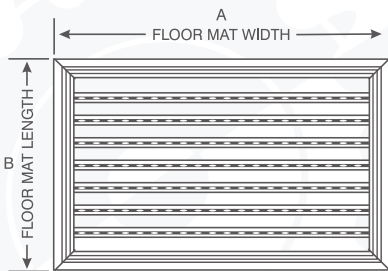

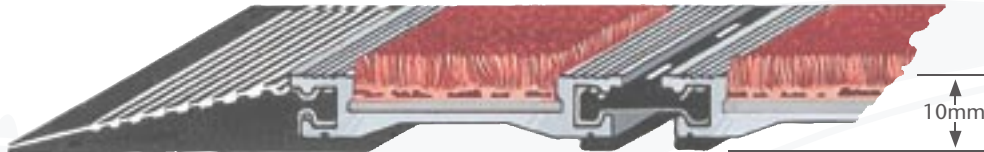

Surface Mounted Entry Mats

Type SDCC: Surface mounted dirt control *carpet infill*.
Standard colour grey.
Ramped 4 sides standard,
2 sides on request – specify
