SPEED HUMPS

Heavy Duty
Modular Systems

SPECIFICATIONS

The Latham Speed Humps Version 1A has been successfully utilised worldwide as a speed deterrent for over 15 years. It is ideal for areas of intense traffic such as manufacturing sites, large retail parks and hospitals. It is a product that is extremely durable and can cope with loads of up to 30 tonnes.

- modular construction provides for easy installation and relocation to suit individual site requirements
- yellow and black rubber coloured sections provide a highly visible speed deterrent
- grooved surface assists traction in wet and icy conditions
- end caps allow for the safe passage of forklifts/trucks and bicycles as well as pedestrians
- centre sections are 350mm (D) x 250mm (W) 54mm (H)
- end sections are 350mm (D) x 180mm (W) x 54mm (H)
