The SCAL Carpet-Line Series floor-to-wall expansion joint covers are designed to be installed in carpet applications with a recess in the top of the cover plate to accommodate a direct stick carpet tile to a thickness of 6mm, offering a minimising effect when viewing the expansion joint cover. This system is installed with CA-16 block out anchors or cast into topping or a slab, using CA-6 anchors. They would commonly be used in locations such as shopping centres, hotels, office foyers, schools, airports and other pedestrian traffic situations.
