The HHSL Series Heavy-Duty Pedestrian expansion joint covers with stainless steel cover plates are designed for heavy-duty pedestrian applications where floor-to-wall expansion joints are required. These are designed to work with the HHS Series floor expansion joint covers. They can accept heavier traffic (subject to the load and the span) such as EWP's. For more load information, contact Latham Australia who can supply point loads to suit various traffic loads and wheel sizes. For regular vehicular traffic, the HDS or EHDF Series should be considered.
