The HHAAF Series Heavy-Duty Pedestrian expansion joint covers are designed to mirror the movement of the HHA Series. Equipped with smooth aluminium cover plates, they are intended for heavy-duty pedestrian applications where floor-to-wall expansion joints are required. Designed to work with the HHA Series floor-to-floor expansion joint covers they can accept heavier traffic (subject to the load and the span), such as EWPs. For more load information contact Latham Australia, who can supply point loads to suit various traffic loads and wheel sizes. The HHAAF also offers extended movement over the traditional floor-to-wall configuration.
