DRCB-100	100	154	150	93	+/-25mm	50mm	23mm	3mm
DRCB-150	150	194	200	93	+/-25mm	50mm	23mm	4mm

Wider joint widths available on request. All dimensions are in millimetres.

Interior applications only

All mechanical expansion joint fixings by others.

Aluminium embedded members with solid brass cover plate.

The centering bar consists of two elongated spherical rods fastened at opposite ends of a flat spring steel bar. The bar is positioned diagonally across the joint opening with the elongated spherical rods inside the extruded tracks. This unique concept allows for increased rotational movements and maintains constant spring tension at the centre of the cover plate. This greatly reduces the stresses on the embedded anchor sections and the surrounding concrete slabs.

Design subject to change without notice.
